RELIEF AFFORDED BY LIQUIDATION

Market Shows Signs of Weakness in Spots, Tone Unsettled and Prices Straggling.

NEW YORK, September 18 .- The stock market to-day showed the relief afforded by the speculative liquidation which has been offected during the week. The pressure was lightened, and the requirement of the short interest the requirement of the short interest left uncovered was sufficient to cause some raily. The tone was unsettled and uncertain, and the movement of prices straggling and mixed to an unusual degree. Developments outside the technical speculative position of the market were not important except for an easier tone in the rates for call money.

the market were not important except for an easier tone in the rates for call money.

With the easing of the money market there was an outge of gold, the \$500,-000 shipment to South America being controlled by London claims. There was a shipment in addition of \$1,000,-000 to Canada. The decline in cash on all accounts thus foots over \$6,-500,000. Signs of greater weakness were to be seen here and there in the market. American Smelting continued to suffer from the excess of the former speculation. A revival of the subject of increased freight rates is considered significant also of continued unsatisfactory conditions of railroad earnings. On the other hand, industrious use fivas made at the Stock Exchange of the rumors of coming announcement that was to benefit the market.

Bonds were heavy. Total sales, par value, \$3,970,000.

United States bonds were unchanged on call.

Total sales to-day 791,400 shares.
